Kujala, P., & Niemelä, M. (2024). Mental well-being and fear: Examining the association between affective well-being and affective fear of crime in Finland. *Finnish Journal of Social Research*. <https://doi.org/10.51815/fjsr.128746>

Appendix table 1. Median regression model for affective fear of crime with least absolute deviations of the explanatory and contextual factors. Interaction models.

	Model 4	Model 5
Poorer affective well-being	0.220*** (0.034)	0.111 (0.068)
Age	0.0126 (0.008)	0.013 (0.009)
Female (ref. Male)	0.151 (0.179)	0.174 (0.174)
Level of education (ref. Higher)		
Medium	-0.396* (0.169)	-0.355 (0.193)
Lower	-0.409* (0.165)	-0.493 (0.279)
Labour market position (ref. Employed)		
Unemployed	0.453 (0.551)	0.502 (0.630)
Retired	-0.774** (0.261)	-0.792* (0.315)
Student	0,132 (0.38)	-0.019 (0.525)
Other	-0,321 (0.838)	-0,271 (0.846)
Difficult to make ends meet (ref. Easy)	-0,088 (0.22)	-0.106 (0.21)
Feelings of unsafety (ref. No)	2.365 (1.25)	4.134*** (1.037)
Generalized distrust	0.333*** (0.062)	0.177* (0.088)
Poorer affective well-being *	0.497**	
Feelings of unsafety (ref. No)	(0.162)	
Poorer affective well-being *		0.045*
Generalized distrust		(0.022)
Intercept	-0,585 (0.351)	-0,334 (0.432)
N	2,587	2,587
Pseudo R²	0.087	0.085

Note: Robust standard errors in parentheses.
Statistical significance: * p<0.05, ** p<0.01, *** p<0.001
